Title of the Project

Lodge Booking Management System

Date : 29/10/2020

Problem Statement :

This is a system which is mainly made for management of a Lodge. The project Lodge Booking Management manages and maintains the records of customers and rooms in the lodge. Lodge also has other facilities like restaurant, swimming pool etc. So these charges and records will be maintained accordingly.

This system has been made in a user friendly interface, so that normal person can add, delete and modify the entries of customer and handle the transactions of customers easily.

List of Classes in your application domain:

1. User Class
2. Role Class
3. Permission Class
4. Lodge Class
5. Room Class
6. Booking Class
7. Customer Class
8. Payment Class

Functional requirements of the project :

1. Easy management of checking –in and other processes.
2. This system saves time.
3. Can give accurate information about lodge when required.
4. Billing becomes easy using this system.
5. Customer information is available anytime.
6. This system also reduces paper work.
7. Easy to use, efficient, and accessible.
